

# RITRANSPARENCY REPORT 2020

## Smith & Williamson Investment Management LLP

#### About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <a href="PRI website">PRI website</a>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

#### PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

### Usage restrictions

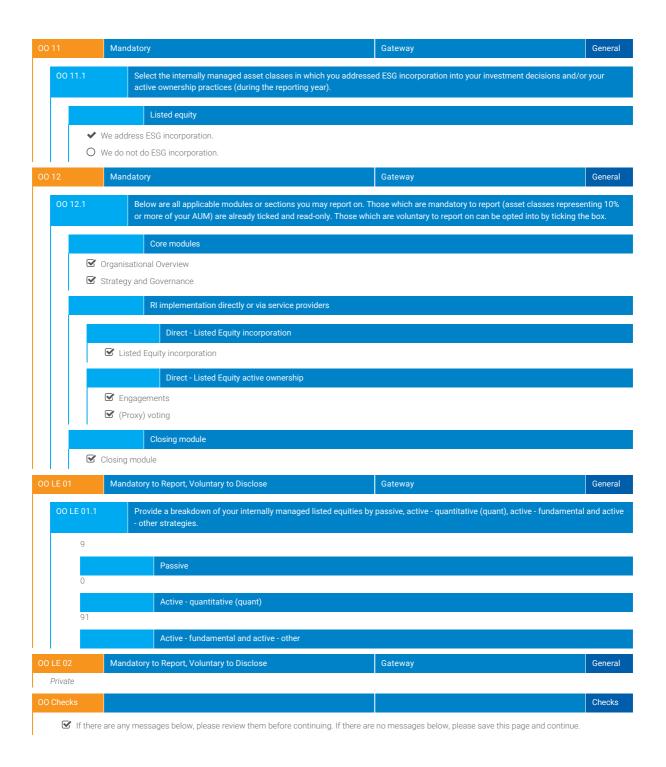

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

G 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Our approach to portfolio management is underpinned by the belief that each client needs a bespoke portfolio designed to meet their individual objectives. This encompasses everything from individual stocks held in the portfolio and reporting requirements to the broad asset allocation and ethical overlay. Within this our investment philosophy rests on three key pillars:

- Liquidity: portfolios need to be flexible in order to adapt to changing economic and market conditions. We look to hold high quality
  investments which trade on large liquid markets. We regularly assess the liquidity of our portfolios, especially in the fixed interest and
  alternative sectors.
- Quality: clients with long term horizons should invest in stocks that can grow over the long term. Companies with sound balance sheets and healthy cash flow generation are likely to grow their dividends, and sustainable business models should outperform across the economic cycle. To be clear, 'sustainable' includes consideration of ESG factors.
- Genuine diversification: we do not look to outperform just in bull markets or just in bear markets; instead we use genuine diversification to add
  value throughout the economic cycle, and also to preserve capital during unexpected shocks.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Asset Allocation Process

- Strategic Asset Allocation process: identifies the appropriate mix of asset classes for various different broad risk and return profiles. The
  focus is on matching our long term capital market expectations with the requirements of different client types. We consider our in-house 20year return forecasts, current asset class/regional valuations and a large degree of qualitative overlay.
- 2. Tactical Asset Allocation process: devises short and medium term deviations away from the strategic asset allocation in order to add value in terms of either increased return or reduced risk. The committee of senior investment managers and strategists consider a set of leading macroeconomic indicators, market sentiment scores and their own research. The results are established by taking an average of the individual views.
- Security Selection Process

We have 56 sector specialists who assign buy, hold and sell recommendations to our investment universe of UK and overseas equities. Smith & Williamson puts particular emphasis on balance sheet quality, cash generation and long term strategic drivers, as well as the qualitative views of the individual analysts. We are long term fundamentally driven investors the sustainability of each business is a key part of the process so understanding the ESG factors affecting each company is a part of the process of evaluation of the likely future success of each investment we make. The stock selection process is supplemented by our fund analysts and fixed interest specialists who produce recommendations for bonds, alternatives, real estate and collective investments.

All our analysts are also investment managers with client responsibility. This ensures that our research is produced from a practical buy side perspective and that our analysts have a stake in the ideas they produce (as they will buy these for their own clients).

Portfolio Construction

The output of the asset allocation and security selection processes are recommendations rather than mandatory actions or central model portfolios. We believe that it is the individual investment managers who know their clients best and as such they are the best placed to decide how to implement asset allocation and security selection decisions. The manager is responsible for considering the client's risk profile (capacity for loss), restrictions (ethical or asset class), time horizon, return objectives and other constraints when structuring a portfolio. Each client is able to set their own restrictions on their portfolio including ethical and ESG constraints.

SG 03.2 We define a conflict of interest as a situation which arises when: our interests or the interests of a partner, director or employee conflict with the duties it owes to a client; or the duties we owe to one client conflict with the duties we owe to another client. We take all reasonable steps to identify conflicts of interest arising and to manage potential conflicts in a way that is fair to our clients and in accordance with our written policy. We avoid and manage these conflicts through a number of policies and procedures. These include · Maintaining a confidentiality policy · Restricting staff dealings in securities • Restricting information flows Carrying out transactions in Investments as agent not as principal • A policy to ensure gifts and inducements received from or given to third parties by members of staff are declared, and pre-approved as appropriate. • Maintaining appropriate and transparent charging policies · Disclosing in accordance with market practice • Obtaining clients' informed consent O No

SG 03.3 Additional information. [Optional]

S&W is not subject to any conflicts arising from its ownership structure. The only substantial shareholder of the group is AGF Management Ltd, a Canadian investment management firm which owns 30%, with the rest owned by current and retired staff and their families. No third party product provider or supplier has a material shareholding or financial interest in the S&W (or vice versa) such as to be able to influence S&W's operating decisions to the detriment of client interests. We take all reasonable steps to identify conflicts of interest arising and to manage potential conflicts in a way that is fair to our clients and in accordance with our written policy.

Eartha fi			anted our own in-house policy. The set	inge focuses on transporance
commun	ications; corporate culture; strat	olicy as a template, from which we have ad egy; financial disciplines, structure and ma wing what is considered to be best practice	anagement; stakeholders, environmenta	al and social issues; and

codes

In most cases, Glass Lewis vote with management. Where Glass Lewis recommend that we vote in line with management, the vote will go through automatically. The Corporate Actions Team create a report for the Stewardship & Responsible Investment Group (SRIG) for any company meeting where the Glass Lewis recommendation is to vote against management. Where they recommend to vote against management, SRIG asses the information, pass it to the relevant direct/ investment trust analyst and/or the Investment Process Committee if necessary for advice prior to the final decision. The SRIG and all investment analysts have access to the Glass Lewis voting platform. All votes will have a deadline of 72 hours before the meeting, to allow time for Glass Lewis to send Broadridge the voting instructions and for Broadridge to then submit the votes. Broadridge carry out the electronic voting instructions.

In keeping with our commitment to the UK Stewardship Code and UN PRI, we are mindful of the need to be transparent in our voting. S&W keep a record of all engagement and voting activity which is updated quarterly and available on our website, we also produce an annual report containing these figures. Where S&W decide to vote against or abstain from voting in favour a management proposal we write to the management explaining our reasons, opening up a dialogue with the company. Where we receive additional information from the company pertaining to any issues raised, we may, if appropriate, amend our vote.
